To whom it may concern,

February 25th, 2021

A few years ago, my family business financials were handed over to me and they were an absolute mess. We had no time or patience when it came to doing financials and we needed help. We were introduced to Jacob at Vision Financial and things immediately started to change.

There is no price tag when it comes to peace of mind and Vision delivers this like no other. We had a lot of sleepless nights worrying about whether or not we were going to dig ourselves out of this hole. Jacob and his team were warm, understanding, and confident that we could right this ship and they did. Words cannot express how nice it is to have professionals on your side that allow you focus on operations and not worry about notice after notice coming in from past mistakes.

A new found world has arisen in our business where we can focus on the things that we are good at (operations and customer service) and allow someone to handle all the inconveniences (tax notices and financial paperwork). We cannot tell you how much of a relief it to allow Vision to have our backs. Do yourself the same favor, work with professionals. You won't regret it.

Sincerely,

A handwritten signature in black ink, appearing to read 'Patrick Dolan', with a long horizontal flourish extending to the right.

Patrick Dolan
